

Team Management Systems Sample TMS Hubs

The **Team Management Systems (TMS)** blended learning model, together with our self-reporting Profiles (the TMP, WoWV and QO₂) provides a framework and methodology from which to build your organization's development activities.

Combining a 10-minute questionnaire with online learning activities, located within the **TMS Hubs**, and a facilitated workshop or debrief, the TMS blended learning model helps build greater self-awareness, improved communication, more effective individuals and stronger leaders.

The Hub Applications interact with an individual's personal Profile results, and the feedback and expert tips are customized, making the experience unique. Learners have access to individually tailored activities, instant feedback on work priorities and performance, and global trends.

Use the login details below to view a sample of each of the TMS Hubs and self-report Profiles.

Visit www.TMSProfiles.com and select 'Respondent Access'
